## SUMMARY

I am a mobile developer and front-end developer with over two years of experience. I have a strong interest and experience in creating and developing Android/iOS mobile applications and websites. My most recent experience has been as a mobile developer using the React Native framework. I have developed the Schoolfess Indonesia and SBM Indonesia websites and have created, developed, and launched the Schoolfess and Halalpedia Applications, which are available for download on both the Play Store and the App Store. I possess problem-solving skills, critical thinking, and effective communication while working. I am highly enthusiastic about learning new technologies and always ready to take on new challenges. I believe that my experience and skills can contribute positively and effectively.

## WORK EXPERIENCES

### PT. RASTEK INOVASI DIGITAL

Mar 2024 – Present

Full – Time - Mobile Developer

- Developed and maintained the IDMAI Mobile Survey Apps for BAPPENAS, facilitating its use by farmers across Indonesia to enhance agricultural productivity and data collection.
- Collaborated seamlessly with Back-End Developers, UI/UX Designers, Computer Vision experts, and the Project Manager to innovate and develop new features, integrating cutting-edge Machine Learning technology to improve functionality.
- Conducted thorough code evaluations and optimizations, achieving a significant 25% improvement in application performance, enhancing user experience and operational efficiency.
- Performed manual quality assurance to ensure the application runs smoothly and is free of major bugs, guaranteeing a seamless user experience.

### PT. HALAL PEDIA INDONESIA

Aug 2023 – November 2023
